Professional Summary

Data Analyst and Computer Science graduate (B.Tech, CGPA 8.67/10) skilled in SQL, Python, Power BI, Excel, and Tableau. Built end-to-end analytics solutions on 1,000,000+ banking transactions and 500,000 sales orders, including star-schema data models, 50+ DAX measures, KPI dashboards, and profitability and revenue-leakage analysis. Strong in data cleaning, EDA, business reporting, and data storytelling for decision-making.

Technical Skills

Data Visualization & BI: Power BI (DAX, Power Query, Star Schema, Data Modeling), Tableau (Calculated Fields, Parameters), Advanced Excel (XLOOKUP, INDEX-MATCH, SUMIFS, Pivot Tables, Power Pivot)

Databases & SQL: MySQL, PostgreSQL, MongoDB; Joins, CTEs, Subqueries, Window Functions, Aggregations, Query Optimization

Programming & Analysis: Python (Pandas, NumPy, Matplotlib, Seaborn, Plotly, Scikit-learn), Exploratory Data Analysis (EDA), Data Cleaning, Statistical Analysis

Business & Financial Analysis: KPI Tracking, YoY Growth, Profitability and Margin Analysis, Cash-Flow Analysis, Risk Analysis, Revenue-Leakage Analysis, Data Storytelling

Tools & Platforms: AWS Cloud, Git, GitHub, Jupyter Notebook, Google Colab, VS Code, MySQL Workbench

Work Experience

Data Analytics Trainee (Part-Time, Hybrid) 2025 – Present
Skillected by JSSAV Edu. Pvt. Ltd., Pune, India

- Analyzed 10,000+ records using Python, SQL, Power BI, and Excel to identify trends and business insights.
- Performed data cleaning, transformation, and exploratory data analysis (EDA) to prepare datasets for reporting.
- Built interactive Power BI dashboards that supported data-driven decision-making.

Python Programming Intern (Remote) 2025
YBI Foundation

- Processed and analyzed 5,000+ records in Python using data cleaning, manipulation, statistical analysis, and visualization.
- Completed hands-on analytics projects using Pandas, NumPy, and Matplotlib.

Projects

Banking & Finance Analytics Dashboard
Power BI, DAX, Python, Excel, AWS Cloud

- Unified transaction, customer, and lending metrics from 1,000,000 banking transactions into a single analytics view.
- Cleaned data using Python and Excel and designed a star schema with 8 dimension tables on AWS Cloud.
- Developed 50+ DAX measures (transaction success rate, net cash flow, YoY growth, loan penetration) and a 7-page interactive report with drill-through, slicers, and navigation.
- Identified channel performance, transaction-failure risk, and loan-uptake trends to support business decisions.

Global Defense Sales Dashboard
SQL (MySQL), Python, Excel, Power BI, GitHub

- Analyzed 500,000 orders to evaluate sales, profitability, and fulfilment by region and country.
- Built an end-to-end pipeline (Excel → Python → MySQL → Power BI) and a 6-page dashboard with year, country, and order-status filters.
- Wrote 15+ SQL queries using window functions, YoY growth, and ranking logic to answer business questions.
- Key findings: 29.81bn net profit at a 14% margin; APAC was the top region with 92bn in sales; 80% of orders completed; 15% revenue leakage identified.

Education

B.Tech. in Computer Science and Engineering 2022 – 2026
NBN Sinhgad College of Engineering, Solapur (Punyashlok Ahilyadevi Holkar Solapur University) – CGPA: 8.67/10

Higher Secondary (12th Science), Maharashtra State Board 2020 – 2022
Haribhai Devkaran College, Solapur – 77.17%

Certifications & Achievements

- Deloitte Australia – Data Analytics Job Simulation (Forage)
- British Airways – Data Science Job Simulation (Forage)
- Secured 4th Rank in class - project (B.Tech, Computer Science and Engineering)
